DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method for producing hydrogen gas from a hydrocarbonaceous material, classified in class 208, subclass 126.
- II. Claims 10-13, drawn to a power system, classified in class 429, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. Group I, functions to produce hydrogen from hydrocarbonaceous material, and group II functions as a power system with a fuel cell that utilizes hydrogen to produce electricity.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Ira Dorman on May 25, 2004 to request an oral election to the above restriction requirement, but Applicant requested a written restriction.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
